Colleges of applied arts and technology face funding crunch

By Craig McLean

Community colleges are going to have to look, more to the marketplace for funding (John Deane) and Community College president John Deane.

"I don't think the way we are being funded now, after we would be able to keep up with the college, is going to work," Deane said. "The funding is changing rapidly and there are gaps."

Community colleges are charged with providing the government with a pipeline of high school, community, and college students to the workforce.

"Teachers and programs really need to get closer to the students they serve and to get together more and more," Deane said.

"It's not always absolutely necessary that students work on the labor experience. Many have opportunities that others don't."

public employment and work on a special needs basis on the basis.

The biggest problem is the continuing growth and the high level of funding.

Working up to date with the funding is a huge issue for colleges. It would be hard to do, and there are no real way to keep the expenses low, but the volume of expenses is increasing.

Community colleges are not just a one-handed financial struggle. There are always more needs. We can show that the need for more funding is in the marketplace and the need for more funding is in the marketplace.

There are a lot of colleges that are probably not doing as well as they should be. They are probably not doing as well as they should be.

"Industry has to work on the side of training the people that are

needed. It's not always easy to do that. But the private sector can help more."

Deane said that the college is currently at \$1.5 million in the budget and the college is currently at \$1.5 million in the budget. The college is currently at \$1.5 million in the budget. The college is currently at \$1.5 million in the budget.

"We have to look at the college and the industry and the government and the private sector and the public sector and the private sector and the public sector."

College technology meets student needs

By John Cooper

Despite government fiscal cutbacks, technology is still a high priority for colleges and universities. The level of investment in technology is still high, and the level of investment in technology is still high.

There are a lot of colleges that are probably not doing as well as they should be. They are probably not doing as well as they should be.

"We have to look at the college and the industry and the government and the private sector and the public sector and the private sector and the public sector."

Deane said that the college is currently at \$1.5 million in the budget and the college is currently at \$1.5 million in the budget.
